

SBOM

Software Bill of Materials

CleanStart SBOM

From Lists to Supply Chain Intelligence

Executive Overview

Modern software supply chains depend on visibility and trust. Yet most SBOMs fail to deliver either. Across popular tools, nearly half of SBOM fields are marked as **NOASSERTION**, leaving organizations blind to hidden risks, vulnerable during audits, and slow to respond to emerging threats.

CleanStart SBOM eliminates these gaps with 99.2% completeness, commit-level traceability, and full SPDX 3.0 compliance. For CISOs and security leaders, that means faster audits, stronger incident response, and lower supplier risk across the enterprise.

The Problem: NOASSERTION and Incomplete SBOMs

88% Missing Supplier Information

95% Missing Build Timestamp

60% Missing Dependencies

Result: missed vulnerabilities, weak compliance posture, and supply chain blind spots.

Business Value for Security Leaders

Cut audit prep
from weeks to
hours

Accelerate vendor
risk & M&A
diligence

Generate SBOMs
directly in CI/CD
pipelines

Deliver audit-ready
SBOMs for EO
14028, EU CRA,
NIS2, FDA, RBI

Key outcomes:

94%

Fewer untracked
vulnerabilities

95%

Aster M&A
due diligence

\$14.8M

Estimated compliance
cost avoidance.

Conclusion & Next Steps

SBOMs are now a compliance baseline. Incomplete SBOMs create blind spots and operational risks. CleanStart SBOM delivers compliance-ready, complete, and actionable intelligence at scale, giving security leaders the confidence to meet regulatory requirements and strengthen supply chain resilience - talk to your CleanStart representative to get started today.
